

Driveway Snow Blowing Guidelines

Our tractors need a little room to work.

If you park your vehicle(s) 10' from the driveway opening, our operators have less obstacles.

For best results:

Please remove vehicles from your driveway prior to the snow arrival and shovel 24" from your garage door.

The "Forest City" is a beautiful place. The lower branches can harm the tractors.

If you trim your trees to a level of 10-12' our tractors can stay beautiful too.

Extra Credit

Garbage bins, extension cords or loose debris are unseen obstacles to the operator.

Pre-salting of your driveway yields superior results.
